

Our continuous qualitative growth is based upon the above-average competence of our team and the consequent use of the approved Ingenics method. To further upgrade our project team in Atlanta, we are looking for a:

› Material Handling Engineer

Your responsibilities:

- Develop material handling concepts for our national and international customers, primarily in the production area of the automotive industry.
- Develop concepts for an optimized material staging, material flow planning and direct deliveries.
- Design strategies, how logistics systems can be more efficient by implementing lean tools such as JIT, JIS, Kanban, etc.
- Recommend layout plannings or optimize them.
- Oversee the implementation of all actions.

Your profile:

- You have an above average engineer qualification specializing in Logistics, Supply Chain or Production Management or a comparable degree and have gained professional experience in the field of logistics, preferably in or for the automobile industry.
- You have already worked with methods such as layout planning, value stream analysis, JIS, JIT, Kanban or milkrun.
- You have proven results in the planning and realization of complex projects.
- You have an interest in other cultures and the corresponding mobility to enthusiastically take new paths for our national and international customer projects.

Should you be interested, please send your complete application (including resume and cover letter) to Ms. Rebecca Adams, your contact person in Ulm, Germany.
