

Ingenics is a **leading consulting firm** that helps companies across a range of industries to achieve lean operational excellence. Our comprehensive approach covers all phases of a project: from initial planning to systems design, final implementation, and continuous improvement. Ingenics' key services can be defined as: planning, optimization and qualification with focus on three key business areas — factories, logistics and organization.

To further expand our project team **in China**, we are looking for a:

› Senior Project Engineer – Logistics Planning (m/f/d)

Your responsibilities:

- › For our domestic and international customers, you will be responsible for developing the concrete planning and implementation of logistics projects for all stages of a cross-company value chain.
- › You will be designing systems aligned with logistics requirements, including material and information flows, operating resources, structures, and investments – from the suppliers through to production.
- › Your duties will include assisting and supporting our partners in China with the planning and implementation of your projects.
- › You will be responsible for professional and skilled project management in your task area.

Your profile:

- › Degree or Masters in Industrial Engineering, other Engineering Disciplines or Business Administration and 3-5 years of professional working experience in the field of Logistics.
- › Experience in logistics planning and efficiency improvement projects for manufacturers, especially in the Automotive Industry.
- › Profound experience in the logistics planning process for at least 3 of: Production Logistics, Warehouse Logistics, Inventory Management, Transportation Logistics, Supply Chain Logistics, Logistics IT Solutions, Supplier Management.
- › Deep founded knowledge and hands-on experience in the planning and application of logistics supply methods: JIT, JIS, Kanban, Supermarket, Milkrun etc. is essential.
- › Excellent communication and presentation skills, including quick understanding and active listening, good team player.
- › Ability to work independently with customers in complex project tasks as well as working in international project teams.
- › Excellent command of English and Chinese (knowledge of further languages especially German would be advantageous).
- › Based in Shanghai or Shenyang Office. Willingness for domestic and international travel over longer project durations is required.

Ingenics offers:

- › A modern, team-oriented working environment with many opportunities for personal development and further training on the job.
- › Due to the worldwide presence of our customers, you have the chance to gain knowledge and experience in international projects.
