

Ingenics is a **leading consulting firm** that helps companies across a range of industries to achieve lean operational excellence. Our comprehensive approach covers all phases of a project: from initial planning to systems design, final implementation, and continuous improvement. Ingenics' key services can be defined as: planning, optimization and qualification with focus on three key business areas — factories, logistics and organization.

To further expand our project teams in **Greenville and Tuscaloosa** we are looking for an:

› Industrial Engineer (Senior) (m/f/d)

Your responsibilities:

- › Plans and manages industrial engineering changes, deviations, process method changes and process sequence changes to logistical process;
- › Implements draft layout of equipment to illustrate maximum efficiency;
- › Reviews production schedules to facilitate the manufacturing procedure and activity;
- › Initiates quality control procedures to optimize manufacturing and cost-effective benefits for logistical projects; and
- › Performs sophisticated analysis on industrial process, quality and systems deficiencies.

Your profile:

- › U.S. Master's degree in Industrial and Systems Engineering and twelve months of professional experience as Industrial Engineer.
- › Any suitable combination of education, training or experience is acceptable.

Ingenics offers:

- › A modern, team-oriented working environment with many opportunities for personal development and further training on the job.
- › Due to the worldwide presence of our customers, you have the chance to gain knowledge and experience in international projects.
