

Ingenics AG is a worldwide operating consultancy, which has successfully positioned itself as a strategy and project partner for mid-sized and large corporations for 40 years. The Ingenics service portfolio is focusing on the entire value chain, covering consulting on strategic matters, improving efficiency in processes and organization, as well as planning and implementation.

To further expand our project team **in China**, we are looking for a:

› Process Planner Aerospace (m/f/d)

Your responsibilities:

- › You will be responsible for carrying out on-site inspections in the relevant production areas as well as for preparing process records for our customers in the aerospace and supplier industry.
- › Your tasks will include the analysis of the considered production process and its synchronisation.
- › You will examine the possibilities for optimising and rationalising the production process and take over the capacity calculation for the optimum design of the production capacities.
- › You will also be responsible for conducting KAIZEN workshops.

Your profile:

- › You have successfully completed a degree in mechanical engineering, production engineering, industrial engineering or a similar technical course of studies and gained (first) professional experience. Practical experience in the aerospace industry is an advantage for this position.
- › In addition, you have practical knowledge of analysis and evaluation in the area of production planning and lean production, complemented by knowledge of work preparation, process planning or material and production control.
- › Ideally, you already have practical experience in the application of common industrial engineering tools.
- › You are familiar with MS Office.
- › You are characterized by strong team and communication skills, assertiveness, high resilience and flexibility.
- › Good command of Chinese and English, knowledge of further languages especially German would be an advantage.
- › Based in Shanghai or Shenyang Office. Willingness for domestic and international travel over longer project durations is required.

Ingenics offers:

- › A modern, team-oriented working environment with many opportunities for personal development and further training on the job.
- › Due to the worldwide presence of our customers, you have the chance to gain knowledge and experience in international projects.
