

Ingenics is a **leading consulting firm** that helps companies across a range of industries to achieve lean operational excellence. Our comprehensive approach covers all phases of a project: from initial planning to systems design, final implementation, and continuous improvement. Ingenics' key services can be defined as: planning, optimization and qualification with focus on three key business areas — factories, logistics and organization.

To further expand our project teams in **Shanghai** and **Shenyang**, we are looking for a:

## › Project Engineer Construction Project Management (m/f/d)

### Your responsibilities:

- › You will advise our domestic and international customers on the design, project planning, and development of efficient plant and factory structures.
- › You will be responsible for calculating costs and preparing planning and implementation schedules for the design and planning of factory and production buildings.
- › Your duties include coordinating the interfaces between the various planning departments, subcontractors and plant and equipment suppliers, as well as providing assistance with the bidding process and contract award.
- › You will be in charge of the project management and the scheduling, deadline monitoring, quality control and cost controlling for the construction and implementation measures.

### Your profile:

- › You have an above-average university degree in construction engineering or architecture, or a comparable technical degree.
- › With several years of professional work experience in the construction project management field, you have strategic, design, and analytical skills, and have acquired experience in all service and construction phases.
- › Experience in working in the automotive industry would be an advantage.
- › You are ready to meet challenges on site at our customers' locations.
- › Ability to support our customers in complex project tasks as well as working in international project teams.
- › Good command of Chinese and English (knowledge of further languages especially German would be advantageous).
- › Based in Shanghai or Shenyang Office. Willingness for domestic and international travel over longer project durations is required.

### Ingenics offers:

- › A modern, team-oriented working environment with many opportunities for personal development and further training on the job.
- › Due to the worldwide presence of our customers, you have the chance to gain knowledge and experience in international projects.
