

Ingenics is a **leading consulting firm** that helps companies across a range of industries to achieve lean operational excellence. Our comprehensive approach covers all phases of a project: from initial planning to systems design, final implementation, and continuous improvement. Ingenics' key services can be defined as: planning, optimization and qualification with focus on three key business areas — factories, logistics and organization.

To further expand our project teams in **Greenville (SC) and Tuscaloosa (AL)** we are looking for a:

› Process Engineer (m/f/d)

Your responsibilities:

- › Reviews new product design impacts through the Change Management System process and provides feedback on process time analysis and investment requirements.
- › Analyzes product design impacts and prepares product change information packages for implementation;
- › Provides engineering plan requirements for manufacturing enhancements;
- › Drafts and designs layout of equipment to illustrate maximum efficiency; and
- › Documents required product and process changes in computer based internal system.

Your profile:

- › U.S. Master's degree or foreign equivalent in Engineering and six months of professional experience as Project Engineer.
- › Any suitable combination of education, training or experience is acceptable.

Ingenics offers:

- › A modern, team-oriented working environment with many opportunities for personal development and further training on the job.
- › Due to the worldwide presence of our customers, you have the chance to gain knowledge and experience in international projects.
